## **DETAILED ACTION**

### ***Drawings***

1. The subject matter of this application admits of illustration by a drawing to facilitate understanding of the invention. Applicant is required to furnish a drawing under 37 CFR 1.81. No new matter may be introduced in the required drawing.

### ***Abstract***

2. The abstract is objected because of the following reasons:

Applicant is reminded of the proper content of an abstract of the disclosure.

A patent abstract is a concise statement of the technical disclosure of the patent and should include that which is new in the art to which the invention pertains. If the patent is of a basic nature, the entire technical disclosure may be new in the art, and the abstract should be directed to the entire disclosure. If the patent is in the nature of an improvement in an old apparatus, process, product, or composition, the abstract should include the technical disclosure of the improvement. In certain patents, particularly those for compounds and compositions, wherein the process for making and/or the use thereof are not obvious, the abstract should set forth a process for making and/or use thereof. If the new technical disclosure involves modifications or alternatives, the abstract should mention by way of example the preferred modification or alternative.

The abstract should not refer to purported merits or speculative applications of the invention and should not compare the invention with the prior art.

The abstract is objected because phrase "said" is used in the abstract.

### ***Claim Rejections - 35 USC § 101***

3. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

4. Claims 1-3, 6-12 are rejected under 35 USC 101 because the claimed invention is directed to non-statutory subject matter.
5. Claims 1-3 and 6-12 are cited under 35 U.S.C. 101 as not falling within one of the four statutory categories of invention. Supreme Court precedent<sup>1</sup> and recent Federal Circuit decisions<sup>2</sup> indicate that a statutory "process" under 35 U.S.C. 101 must (1) be tied to another statutory category (such as a particular apparatus), or (2) transform underlying subject matter (such as an article or material) to a different state or thing. While the instant claim(s) recite a series of steps or acts to be performed, the claim(s) neither transform underlying subject matter nor positively tie to another statutory category that accomplishes the claimed method steps, and therefore do not qualify as a statutory process. Independent claims 1 and 6 should recite after the preamble "The following steps are performed using processor/computer"..

Claims 1-3, 6-12 refers to a method in their preamble, the body of claims contains no steps, only description of syntax. Because syntax is not falling within one of the four statutory categories of invention, claims 1-3 and 6-12 are rejected under 35 USC 101.

<sup>1</sup> *Diamond v. Diehr*, 450 U.S. 175, 184 (1981); *Parker v. Flook*, 437 U.S. 584, 588 n.9 (1978); *Gottschalk v. Benson*, 409 U.S. 63, 70 (1972); *Cochrane v. Deener*, 94 U.S. 780, 787-88 (1876).

<sup>2</sup> *In re Bilski*, 88 USPQ2d 1385 (Fed. Cir. 2008).

Claims 4 and 7, recite in the preamble , the bodies of claims do not recite device, components/units or means. Furthermore body of claim only specify syntax. Because syntax is not falling within one of the four statutory categories of invention , claims 4 and 7 are rejected under 35 USC 101.

Claim 5, recites in the preamble transmittable video signal. A signal is not falling with one of the four statutory categories of the invention.

### **Claim Rejections - 35 USC § 112**

6. Claims 1-4 and 6-12 are rejected under 35 USC 112 second paragraph as being vague and indefinite because of the following reasons.

The bodies of claims do not recite any steps, only the syntax. Because method is based on steps and claims 1-3 and 6 contains no steps therefore claim 1-3 and 6-12 are indefinite and vague.

The bodies of claims 4 and 7 recite encoding device, however the are no details of the device in the boy of claims therefore claims 4 and 7 are vague and indefinite.

Claims 1-12 are rejected under 35 USC 112 first paragraph as failing to comply with enablement requirement .

In the specification, only additional syntactic element is discussed in the form of abstract. No details of a method or device is described. Therefore claims 1-12 lack adequate description in the specification.
